

Many ways lead to Laboe... it doesn't matter whether you arrive by the car, by rail, by bus, or with the Fördampfer from Kiel.

Come from Lübeck, then take the A21/B404 to Kiel and from there further onto the B502 to Laboe.

By train you travel over Hamburg or Lübeck to Kiel from there further on by bus, or in summer with the Fördedampfer from Kiel Central Station to Laboe.

Welcome to Ostseebad Laboe

Welcome to Ostseebad Laboe,
a Balticsea holiday and spa resort

Lying in the interface between Kiel Fjord and the Baltic Sea, the Baltic Bath Laboe is an ideal holiday place particularly for families with children.

Children can swim here playfully in the shallow water and build castles in the sand according to their hearts desire. And if it is a little colder, the sea water swimming pool with sauna and Baltic Sea views provides a successful alternative.

Not only Laboes harbour nostalgia, but also the active life on the Kiel Fjord lends a special maritime atmosphere to the Baltic Bath. Because of the immediate nearness to the Kiel Canal, the most used waterway of the world, dozens of ships pass by daily. Where can one lie on the beach and observe so many passenger ferries, container ships, yachts, fishing trawlers, frigates, and if one is lucky, even a submarine, other than in Laboe at the entrance to the Kiel Fjord? From the harbour in Laboe the Fördedampfer start their trips to Kiel and to the Kiel lighthouse as well as fishing boats for fishing cruises.

We wish you a nice vacation
in the Baltic Bath Laboe!

"**Dünenlandschaft Laboe**" in the 8-ha-natural experience space with a rest hut and an observation platform makes nature an all year round experience. Get to know the coast with its vegetation and its birds with a nature walk. In summer excursions are also offered with an experienced guide.

420,000 litres of pure Baltic water with his natural salinity of 1.5 - 1.8%! Our **sea water swimming hall** lies directly beside the lovely Laboe beach. From the "RELAX" loft you enjoy the unclouded view about the Kiel Fjord up to the Baltic Sea. Those who don't want to swim can relax in the sauna scenery, splash with small children in the toddler pool or slide at speed back into the water from the children's water slide. A nicely sized family and wellness bath, wonderfully situated on the Baltic beach and in comparison to big fun baths, a relaxing pleasure.

Whoever is on the move with the camper finds directly at the marine monument a **camper parking** lot with a disposal station. Up to 18 campers can find a place here. The attractive camping site in Stein is only 3 km away and offers caravan holiday makers a wonderful location nearby the cliff line.

The visit of the world-renowned **naval monument** of the Deutsche Marine Bund is a must to the Laboe visit. From far away the monument of 72 metres is visible in the Baltic sky. Who is not afraid to scale the 341 steps up to the top enjoys marvellous views over the Baltic Sea up to the Danish islands, the Fehmarn Sound Bridge and the hills of the Holstein broads. There is also a lift available.

At the foot of the monument an original **U-995** submarine from the second world war, provides a remaining impression of the narrowness in which the soldiers had to endure.

There are numerous **cycle tracks** and footpaths along the Baltic coast cycle track which can be explored throughout the Probstei. Walking paths of more than 20 km are an invitation to enjoy the scenery. Whoever looks for more sporting activities will find a good selection of activities in the area.

From catamaran and sailboats or Kitesurfen: Laboe is a **Hotspot for water sportsmen**. For Kitesurfers there is an excellent designated area between the submarine and the dog beach. Those who seek a more leisurely boating sport may give Stand Up Paddling (SUP) a trail!

The Meeresbiologische Station is a **Sea Biology Station**. It offers you an exciting insight into the underwater world of the Baltic Sea. In excursions at the station with its approx. 30 aquariums, you have the opportunity to closely experience life under Baltic Sea and find out lots about the environment. This becomes especially experienceable with a one-hour expedition with the MS "Sagitta", the small research vessel of the Sea Biology Station. With the help of a ground net, fish and plants are taken on board and the specific features are explained to you afterwards by the sea biologists.

For our 4-legged visitors we have arranged a **dog beach**. This is between the submarine and free beach. Please note that dogs are to be kept in the leash in the pedestrian precinct, parks and recreation areas. On playgrounds and on the beaches nearby the town dogs are forbidden.
